

TRIOLOOP STRETCH HOOD

THE FIRST CIRCULAR STRETCH HOOD CONTAINING RECYCLED MATERIAL WHICH REDUCES THE CARBON FOOTPRINT CONSIDERABLY

Our new Triolop Stretch Hood contains 30% recycled material reducing the carbon footprint by 19%. With the new plastic economy in focus, Trioplast uses recycled material for a better environment. And thanks to our knowledge and expertise we can deliver a Stretch Hood to our customers with no compromise on stability and production parameters that is suitable for a wide range of industrial and transportation applications.

FEATURES AND BENEFITS

- Made from 30% recycled material
- 19% reduction in carbon footprint
- Trioplast assures supply via vertical integration
- No compromise on process stability and functionality
- 100% recyclable

CLOSING THE MATERIAL LOOP

Triolop is our brand for polyethylene film that contains recycled material.

By using recycled material, we decrease waste, reduce the carbon footprint and close the material loop. Leaning on our extensive experience in working with recycled polyethylene, we have refined both the quality of the material, and the processes used to produce high quality film with stable properties.

TRIOLOOP PROVIDES A SUSTAINABLE PACKAGING SOLUTION TO THE INDUSTRY
